ACP National Activities:

Fellowship 1994; Abstract Reviewer, Poster Competition

Other Appointments/Activities:

Member, Clinical Competency Committee; Director of Education, Internal Medicine Residency Program; Director of Medicine, Research Program; Recipient, Patient Safety Award, UPMC 2016

Areas of Professional Interest and Expertise:

Patient Safety; High Value Care; Medical Education

Candidate Statement:

As governor, I plan to increase community outreach programs to enhance equity of care through education. As a well-respected organization the ACP can help address the significant mistrust and misinformation that pose significant barriers to care. I also like to emphasize cooperation between the different residency programs in the region to share teaching and educational activities. I plan to reach out to community physicians to address educational needs and causes of burnout.
